Coimbatore, India | +91 8489952154 | naveenkumargp2003@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Computer Science and Design graduate with hands-on experience in Python, Docker and cloud platforms (AWS). Proficient in building containerized applications, AI-integrated workflows, and enterprise solutions using SAP BTP and ABAP Cloud. Interested in developing scalable and automated software solutions that drive real-world impact.

EDUCATION

Karpagam College of Engineering | B.E. - Computer Science and Design | 2022 – 2026

Coimbatore, India | GPA: 7.5 / 10

Senthil Matriculation Higher Secondary School | HSC – State Board | 2020 – 2021

Dharmapuri, India | 78.6%

Sri Vijay Vidyalaya Matriculation Higher Secondary School | SSLC – State Board | 2018 – 2019

Dharmapuri, India | 77.8%

TECHNICAL SKILLS

Programming Languages: Python (Primary), ABAP

Web Technologies: HTML, CSS, Bootstrap

Automation & Testing: Selenium

Databases: MySQL, S/4 Hana

Cloud & DevOps: Docker, Jenkins, Kubernetes

AWS Services: EC2, S3, IAM, VPC, CloudWatch

Operating Systems: Linux, Windows

Version Control: Git, GitHub

ERP & Enterprise Technologies: SAP ABAP (Certified)

Soft Skills: Problem-solving, Team collaboration, Analytical thinking, Communication, Adaptability

PROJECT EXPERIENCE

AI Workflows & Social Media Automation using Make | Jan 2026

Make (Integromat), Google Sheets, Google Gemini AI, Telegram Bot API, LinkedIn, Facebook

- Architected an end-to-end AI automation engine using Make to orchestrate multi-platform content distribution, transforming raw data from Google Sheets into platform-specific posts via event-triggered workflows.
- Integrated Google Gemini AI via API to automate content summarization and post generation, utilizing complex routers and parallel processing to handle concurrent publishing across LinkedIn, Facebook, and Telegram.
- Engineered robust error-handling and execution monitoring protocols, including conditional logic and retry mechanisms, to ensure 100% workflow reliability and significantly reduce manual effort.

AI Workflow Integration using Model Context Protocol (MCP) | Aug 2025

Model Context Protocol (MCP), Cursor IDE, Pipedream, REST APIs, Webhooks

- Architected a scalable AI toolchain by integrating MCP Servers with Cursor IDE and Pipedream, enabling seamless context-sharing between local development environments and cloud-based automation workflows.
- Engineered context-aware automation workflows that utilize real-time AI decision-making to orchestrate complex tasks, improving response accuracy by 25% through advanced prompt-data grounding.
- Optimized developer productivity by implementing API-driven toolchains that automate repetitive task orchestration, resulting in a 30% reduction in manual effort during the software development lifecycle (SDLC).

CERTIFICATIONS

- SAP Certified Back-End Developer – ABAP Cloud (SAP BTP) — Mar 2026
- Oracle Certified Foundations Associate – Oracle University — Oct 2025
- AI using Model Context Protocol (MCP) – CCBP 4.0 Academy — Aug 2025
